Introduction

EliteProof is a cloud based real-time Proofing, Proof-Reviewing and auto correction system with Indic language (Hindi, Marathi, Gujarati etc.) support.

EliteProof is designed and built with scalability and usability in mind to address the ever-changing requirements of the publishing industry.

It connects the "Authors, Editors and Reviewers" and "Authors, Editors and Proofreaders" to make the proofreading and reviewing process simpler, less time consuming.

What it delivers?

Online end to end solution for publishers and university presses for tracking, review, decision making and reporting

Allows broadcast message and XML base annotation

Centralized repository of all documents and their review feedback

Maintains history of review feedback along with annotations

Why Adopt EliteProof?

Best practice process workflows to standardize remote processes

Ability to monitor every stage of reviewing and proofing

Compact status summary

Professional, customizable reports

Seamless integration with any production processes

Personal dashboard to display the summary of pending tasks and jobs

Automatic notification in case of pending jobs

The complete process automation cut down the elapsed time and cost

Supports multiple file formats

Go paperless and go green, avoid printing for review and proofing

How it works?

Process Management

    Proofreading: In Proofing application you can do all the proofreading activities

    ProofReview: In ProofReview application you can review multiple versions of proofs from different users and accept appropriate comment, to form final document.

Project Management

    Define Users

    Project & Job creation

    Resource allocation

    Task assignment

    Reporting
